**AMERICANS WITH DISABILITIES ACT OF 1990**  
**Equal Opportunity for Individuals with Disability**

The contractor and The Township of Piscataway (hereafter "owner") do hereby agree that the provisions of Title 11 of the Americans With Disabilities Act of 1990 (the "Act") (42 U.S.C. S121 01 et seq.), which prohibits discrimination on the basis of disability by public entities in all services, programs, and activities provided or made available by public entities, and the rules and regulations promulgated pursuant there unto, are made a part of this contract. In providing any aid, benefit, or service on behalf of the owner pursuant to this contract, the contractor agrees that the performance shall be in strict compliance with the Act. In the event that the contractor, its agents, servants, employees, or subcontractors violate or are alleged to have violated the Act during the performance of this contract, the contractor shall defend the owner in any action or administrative proceeding commenced pursuant to this Act. The contractor shall indemnify, protect, and save harmless the owner, its agents, servants, and employees from and against any and all suits, claims, losses, demands, or damages, of whatever kind or nature arising out of or claimed to arise out of the alleged violation. The contractor shall, at its own expense, appear, defend, and pay any and all charges for legal services and any and all costs and other expenses arising from such action or administrative proceeding or incurred in connection therewith. In any and all complaints brought pursuant to the owner's grievance procedure, the contractor agrees to abide by any decision of the owner which is rendered pursuant to said grievance procedure. If any action or administrative proceeding results in an award of damages against the owner, or if the owner incurs any expense to cure a violation of the ADA which has been brought pursuant to its grievance procedure, the contractor shall satisfy and discharge the same at its own expense.

The owner shall, as soon as practicable after a claim has been made against it, give written notice thereof to the contractor along with full and complete particulars of the claim, If any action or administrative proceeding is brought against the owner or any of its agents, servants, and employees, the *owner shall* expeditiously forward or have forwarded to the contractor every demand, complaint, notice, summons, pleading, or other process received by the owner or its representatives.

It is expressly agreed and understood that any approval by the owner of the services provided by the contractor pursuant to this contract will not relieve the contractor of the obligation to comply with the Act and to defend, indemnify, protect, and save harmless the owner pursuant to this paragraph.

It is further agreed and understood that the owner assumes no obligation to indemnify or save harmless the contractor, its agents, servants, employees and subcontractors for any claim which may arise out of their performance of this Agreement. Furthermore, the contractor expressly understands and agrees that the provisions of this indemnification clause shall in no way limit the contractor's obligations assumed in this Agreement, nor shall they be construed to relieve the contractor from any liability, nor preclude the owner from taking any other actions available to it under any other provisions of the Agreement or otherwise at law.

**N.J.S.A. 10:5-31 et seq. (P.L.1975, c.127)**  
**N.J.A.C. 17:27-1.1 et seq.**  
**CONSTRUCTION CONTRACTS**

During the performance of this contract, the contractor agrees as follows:

The contractor or subcontractor, where applicable, will not discriminate against any employee or applicant for employment because of age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. Except with respect to affectional or sexual orientation and gender identity or expression, the contractor will ensure that equal employment opportunity is afforded to such applicants in recruitment and employment, and that employees are treated during employment, without regard to their age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. Such equal employment opportunity shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Public Agency Compliance Officer setting forth provisions of this nondiscrimination clause.

The contractor or subcontractor, where applicable will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex.

The contractor or subcontractor will send to each labor union, with which it has a collective bargaining agreement, a notice, to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under this act and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

The contractor or subcontractor, where applicable, agrees to comply with any regulations promulgated by the Treasurer, pursuant to N.J.S.A. 10:5-31 et seq., as amended and supplemented from time to time and the Americans with Disabilities Act.

When hiring or scheduling workers in each construction trade, the contractor or subcontractor agrees to make good faith efforts to employ minority and women workers in each construction trade consistent with the targeted employment goal prescribed by N.J.A.C. 17:27-7.2; provided, however, that the Dept. of LWD, Construction EEO Monitoring Program, may, in its discretion, exempt a contractor or subcontractor from compliance with the good faith procedures prescribed by the following provisions, A, B, and C, as long as the Dept. of LWD, Construction EEO Monitoring Program is satisfied that the contractor or subcontractor is employing workers provided by a union which provides evidence, in accordance with standards prescribed by the Dept. of LWD, Construction EEO Monitoring Program, that its percentage of active "card carrying" members who are minority and women workers is equal to or greater than the targeted employment goal established in accordance with N.J.A.C. 17:27-7.2. The contractor or subcontractor agrees that a good faith effort shall include compliance with the following procedures:

- (A) If the contractor or subcontractor has a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor shall, within three business days of the contract award, seek assurances from the union that it will cooperate with the contractor or subcontractor as it fulfills its affirmative action obligations under this contract and in accordance with the rules promulgated by the Treasurer pursuant to N.J.S.A. 10:5-31 et. seq., as supplemented and amended from time to time and the Americans with Disabilities Act. If the contractor or subcontractor is unable to obtain said assurances from the construction trade union at least five business days prior to the commencement of construction work, the contractor or subcontractor agrees to afford equal employment opportunities minority and women workers directly, consistent with this chapter. If the contractor's or subcontractor's prior experience with a construction trade union, regardless of whether the union has provided said assurances, indicates a significant possibility that the trade union will not refer sufficient minority and women workers consistent with affording equal employment opportunities as specified in this chapter, the contractor or subcontractor agrees to be prepared to provide such opportunities to minority and women workers directly, consistent with this chapter, by complying with the hiring or scheduling procedures prescribed under (B) below; and the contractor or subcontractor further agrees to take said action immediately if it determines that the union is not referring minority and women workers consistent with the equal employment opportunity goals set forth in this chapter.
- (B) If good faith efforts to meet targeted employment goals have not or cannot be met for each construction trade by adhering to the procedures of (A) above, or if the contractor does not have a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor agrees to take the following actions:
- (1) To notify the public agency compliance officer, the Dept. of LWD, Construction EEO Monitoring Program, and minority and women referral organizations listed by the Division pursuant to N.J.A.C. 17:27-5.3, of its workforce needs, and request referral of minority and women workers;
  - (2) To notify any minority and women workers who have been listed with it as awaiting available vacancies;
  - (3) Prior to commencement of work, to request that the local construction trade union refer minority and women workers to fill job openings, provided the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade;

## EXHIBIT B (Continued)

- (4) To leave standing requests for additional referral to minority and women workers with the local construction trade union, provided the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade, the State Training and Employment Service and other approved referral sources in the area;
- (5) If it is necessary to lay off some of the workers in a given trade on the construction site, layoffs shall be conducted in compliance with the equal employment opportunity and nondiscrimination standards set forth in this regulation, as well as with applicable Federal and State court decisions;
- (6) To adhere to the following procedure when minority and women workers apply or are referred to the contractor or subcontractor:
- (i) The contractor or subcontractor shall interview the referred minority or women worker.
  - (ii) If said individuals have never previously received any document or certification signifying a level of qualification lower than that required in order to perform the work of the construction trade, the contractor or subcontractor shall in good faith determine the qualifications of such individuals. The contractor or subcontractor shall hire or schedule those individuals who satisfy appropriate qualification standards in conformity with the equal employment opportunity and non-discrimination principles set forth in this chapter. However, a contractor or subcontractor shall determine that the individual at least possesses the requisite skills, and experience recognized by a union, apprentice program or a referral agency, provided the referral agency is acceptable to the Dept. of LWD, Construction EEO Monitoring Program. If necessary, the contractor or subcontractor shall hire or schedule minority and women workers who qualify as trainees pursuant to these rules. All of the requirements, however, are limited by the provisions of (C) below.
  - (iii) The name of any interested women or minority individual shall be maintained on a waiting list, and shall be considered for employment as described in (i) above, whenever vacancies occur. At the request of the Dept. of LWD, Construction EEO Monitoring Program, the contractor or subcontractor shall provide evidence of its good faith efforts to employ women and minorities from the list to fill vacancies.
  - (iv) If, for any reason, said contractor or subcontractor determines that a minority individual or a woman is not qualified or if the individual qualifies as an advanced trainee or apprentice, the contractor or subcontractor shall inform the individual in writing of the reasons for the determination, maintain a copy of the determination in its files, and send a copy to the public agency compliance officer and to the Dept. of LWD, Construction EEO Monitoring Program.
- (7) To keep a complete and accurate record of all requests made for the referral of workers in any trade covered by the contract, on forms made available by the Dept. of LWD, Construction EEO Monitoring Program and submitted promptly to the Dept. of LWD, Construction EEO Monitoring Program upon request.
- (C) The contractor or subcontractor agrees that nothing contained in (B) above shall preclude the contractor or subcontractor from complying with the union hiring hall or apprenticeship policies in any applicable collective bargaining agreement or union hiring hall arrangement, and, where required by custom or agreement, it shall send journeymen and trainees to the union for referral, or to the apprenticeship program for admission, pursuant to such agreement or arrangement. However, where the practices of a union or apprenticeship program will result in the exclusion of minorities and women or the failure to refer minorities and women consistent with the targeted county employment goal, the contractor or subcontractor shall consider for employment persons referred pursuant to (B) above without regard to such agreement or arrangement; provided further, however, that the contractor or subcontractor shall not be required to employ women and minority advanced trainees and trainees in numbers which result in the employment of advanced trainees and trainees as a percentage of the total workforce for the construction trade, which percentage significantly exceeds the apprentice to journey worker ratio specified in the applicable collective bargaining agreement, or in the absence of a collective bargaining agreement, exceeds the ratio established by practice in the area for said construction trade. Also, the contractor or subcontractor agrees that, in implementing the procedures of (B) above, it shall, where applicable, employ minority and women workers residing within the geographical jurisdiction of the union.

After notification of award, but prior to signing a construction contract, the contractor shall submit to the public agency compliance officer and the Dept. of LWD, Construction EEO Monitoring Program an initial project workforce report (Form AA-201) electronically provided to the public agency by the Dept. of LWD, Construction EEO Monitoring Program, through its website, for distribution to and completion by the contractor, in accordance with N.J.A.C. 17:27-7. The contractor also agrees to submit a copy of the Monthly Project Workforce Report once a month thereafter for the duration of this contract to the Dept. of LWD, Construction EEO Monitoring Program, and to the public agency compliance officer.

The contractor agrees to cooperate with the public agency in the payment of budgeted funds, as is necessary, for on-the-job and/or off-the-job programs for outreach and training of minorities and women.

- (D) The contractor and its subcontractors shall furnish such reports or other documents to the Dept. of LWD, Construction EEO Monitoring Program as may be requested by the Dept. of LWD, Construction EEO Monitoring Program from time to time in order to carry out the purposes of these regulations, and public agencies shall furnish such information as may be requested by the Dept. of LWD, Construction EEO Monitoring Program for conducting a compliance investigation pursuant to N.J.A.C. 17:27-1.1 et seq.

These appurtenances are to be installed in various Township Streets within limits specified in the field, complete in place. Other incidental work on aforementioned various Township Streets shall be incorporated herein pertaining to maintenance and protection of traffic, hot mix asphalt (bituminous concrete) pavement base repair/restoration and/or driveway apron restoration, in accordance with any details and/or direction from the Department of Public Works and these specifications.

When the stakeout of any of the aforementioned items is questionable as to its necessity, the decision to determine its requirement shall be at the discretion of the Director. The layout crew must be proficient in performing this task and will provide a cut sheet when demanded by the Director for each stakeout for approval. All layout operations shall be at the expense of the Contractor and be included in the bid price.

The Contractor shall ensure that no Township trees are damaged during the course of curb and/or sidewalk removals and construction. Tree roots interfering with new construction shall be ground out, or cut by manual methods selected by the Contractor, but tree roots shall not be pulled out with a backhoe.

For the purpose of this contract, any reference to the Public Works Director or his duly authorized representative in the Township of Piscataway Department of Public Works shall henceforth be referred to as the Director.

## **A2. “If and Where Directed” Items.**

**The Proposal Form is based on bids where all Pay Items include an “if and where directed” quantity. Such items are not set forth in a specific location on a schedule of work.**

**Execution of the work of “if and where directed” items shall only be made on written directions of the Director. The term Director shall mean the Director of Public Works of Piscataway or his duly authorized representative. In the absence of written directions, no such items shall be incorporated into the Project and if incorporated will not be paid for. The Director may order incorporation of such items at any location within the Project and at any time during the Contract period. Claims for additional compensation shall not be made because of any increase, decrease, or elimination of such items, nor because of an increase or decrease in the amount of work due to the field conditions encountered in incorporating such items into the Project.**

**b. Dirt Control**

The Contractor shall provide for the prompt removal from existing roadways of all dirt and other materials that have been spilled, washed, tracked or otherwise deposited thereon by the Contractor's operations whenever the accumulation is sufficient to cause the formation of mud, interfere with drainage, damage pavements or create a traffic hazard.

Dust and Dirt Control Measures will not be measured for payment.

**A5. Disposal of Materials and Debris**

The disposal of material and debris accumulated by road construction operations is regulated under the Solid Waste Management Act (NJSA 13:1 E-1) and is governed by NJAC 7:26 et seq. The Contractor shall dispose of construction materials and debris in accordance with the Solid Waste Management Plan developed by the Solid Waste Management district of origin. Proper documentation from the disposal facility shall be submitted to the Public Works Engineer.

Such conditions shall be determined by the Director.

The Township at the discretion of the Director has the option to suspend work as winter whether approaches to maintain quality in the workmanship and viability of the concrete. The Director shall determine when work is to resume upon the end of winter weather. The time suspended by the Director shall not be included in the time of completion.

- B. Forms.** Forms shall be of wood, metal, or other suitable material and shall extend for the full depth of the concrete. All forms shall be true to line, free from warp, and of sufficient strength to resist the pressure of the concrete

without deforming. Curved forms of proper radius shall be used on all radial sections and shall be of an acceptable design. Bracing and staking of forms shall be such that the forms remain in both horizontal and vertical alignment until their removal.

- C. Finishing.** Finishing equipment shall include floats, edgers, spades, tamps, and small vibrators.

## **CONSTRUCTION**

### **1.04 Excavation and Backfilling.**

Excavation shall be according to Subsection 202.03. Backfilling shall be according to Subsection 203.03.02. Any and all excess excavated material shall be disposed of by the Contractor at the expense of the Contractor.

### **1.05 Preparation of Underlying Material.**

Excavation for curbs shall be made to the required depth, and to a width that permits the installation and bracing of the forms. The underlying material shall be shaped and compacted to a firm, even surface. Unstable material shall be removed and replaced with acceptable material that shall be compacted. Depressed curb shall have full depth dimension. No concrete shall be placed until the subgrade has been approved by the Director.

### **1.06 Concrete Curbs.**

- A. Limitations.** The limitations of placing shall be as specified in Subsection 504.03.02C and the following:

1. Placing of concrete shall be discontinued in time to allow finishing to be completed in daylight hours unless an artificial lighting system is provided.
2. Concrete for curbing in cold weather shall conform to Subsection 504.03.02C1 of the Standard Specifications.

- B. Mixing, Placing, and Finishing Concrete.** Construction requirements shall conform to Subsection 504.03.02 and the following:

1. Where changes in the size or shape of curbs occur in a continuous section, the transition between sections shall be gradual.
2. Immediately before placing the concrete, the underlying material shall be thoroughly dampened, and the forms given a coating of light oil or other material which can prevent adherence of the concrete to the forms and which does not discolor the concrete. Where removed and used

again, the forms shall be thoroughly cleaned and treated each time before using.

3. The concrete shall be placed immediately after mixing. The edges, sides, and faces shall be spaded or vibrated and the surface tamped to compact the concrete thoroughly and bring the mortar to the surface, after which the surface shall be finished smooth and even by means of a wooden float.
4. Sleeves for sign or delineator posts installed in barrier curbs shall be filled with sand and sealed with hot-poured joint sealer immediately after installation and shall be resealed if and when posts are installed.
5. Concrete curbs shall be constructed in sections having uniform lengths of 20 feet, unless existing conditions dictate lengths of 10 feet which shall then be constructed as such. The length of these sections may be reduced where necessary for closures, but no section less than 6 feet will be permitted. The forms on the face of all curbs shall be removed as soon as the concrete holds its shape and the surface shall then be finished with a fine hair brush to a smooth and even finish. Plastering will not be permitted. The top edges of curb shall be rounded. Edges where expansion joint material has been placed shall be finished with an edging tool having a radius of not over  $\frac{1}{4}$  inch.
6. As soon as the forms are removed, the concrete shall be covered with wet burlap if finishing prevents the immediate application of curing compound. The concrete shall remain covered until it is to be finished, at which time the wet burlap shall be removed from that amount of concrete that can be immediately finished. As soon as finishing is complete, curing compound shall be applied.
7. Any exposed surface or surfaces against which some rigid type of construction is to be made shall be left smooth and uniform so as to permit free movement of the curb.
8. All tool marks shall be removed with a wetted brush or wooden float, and the finished surface shall present a uniform appearance.
9. Care shall be taken to minimize damage to previously constructed areas. Any damage shall be repaired without additional compensation.
10. Once the concrete curbing has cured, the road pavement contiguous to the newly constructed curb shall be power-hammered or sawcut along the new curb limits, at an offset of 12 inches from the curb face, and road material excavated therefrom to an excavated depth of 7 inches on which a 7-inch thick pavement repair section shall be constructed

thereon consisting of bituminous stabilized base Hot Mix Asphalt, 19M64 Base Course compacted in maximum 2 ½ inch lifts.

- C. Joints.** Expansion joints shall be provided opposite joints in abutting concrete surface course and at approximately equal distances 8 feet between joints. Joints shall be filled with preformed expansion joint filler, ½ inch thick, which shall be flush with the top and face. Between concrete curbs and concrete surface or base course, ½-inch, preformed, expansion-joint filler shall be installed and the joint shall be sealed with hot-poured joint sealer.
- D. Protection and Curing.** Forms may be removed when removal does not damage the concrete. No pressure shall be exerted upon the concrete when removing forms. Protection during cold weather and curing shall be according to Subsection 504.03.02C1.

**For additional protection against scaling from freeze-thaw and deicing materials, the concrete must be protected with a commercially available silane or siloxane-based breathable concrete sealer or water repellent specifically designed for concrete slabs such as Silox-Seal manufactured by Amteco, Inc. located at 1841 F Marietta Blvd., Atlanta, GA 30318, telephone number 800 297 7325 or approved equal. The manufacturer's recommendations must be followed for application procedures and frequency. Prior to use of the sealer, the contractor must provide technical information on the product to be used for approval by the Director.**

The curb shall be protected until finally accepted. During this period, any damage caused by construction operations or cold weather shall be repaired without additional compensation.

1. All denuded or disturbed lawn areas shall be restored to achieve a uniform grade on which screened topsoil shall be raked and area seeded with a seed mix acceptable to the Township. The Contractor shall be responsible for insuring an adequate stand of grass by his top soiling, seeding, fertilizing and mulching operation in the disturbed areas. This stand of grass shall be compatible to original lawn conditions prior to disturbance. Material tickets shall be required for all topsoil and seed products.

## **COMPENSATION**

## CONSTRUCTION

### 6.03 Excavation and Backfilling.

Excavation shall be according to Subsection 202.03. Backfilling shall be according to Subsection 203.03.02. This material shall be placed in layers not exceeding 5 inches in loose thickness and shall be compacted until firm. Any and all excess excavated material shall be disposed of by the Contractor at the expense of the Contractor.

### 6.04 Preparation of Underlying Materials.

The underlying material shall be shaped and compacted to a firm, even surface. Unstable material shall be removed and replaced with dense-graded aggregate that shall be compacted.

### 6.05 Concrete Driveway Aprons.

Concrete driveway aprons shall be constructed according to Section 606.03.02 of the Standard Specifications and the following:

- 1. Mixing and Placing Concrete.** Immediately before placing the concrete, the underlying material shall be thoroughly dampened and the forms given a coating of light oil. Where removed and used again, the forms shall be thoroughly cleaned and oiled each time before using. Mechanical spreaders are not required.

6X6 number 6 welded wire mesh shall be installed evenly throughout the area to receive concrete with a minimum setback of 2 inches from the edge of concrete. A minimum of a 6-inch overlap of the mesh tied with steel wire at one foot intervals is required when factory lengths are not sufficient to cover the entire area in one continuous length of fabric. The wire mesh shall be installed with 2 inch cover of concrete where the concrete meets the ground surface.

When a limit of removal of old concrete is at a joint scored only at the surface and does not penetrate the concrete to its full depth, the joint shall be neatly saw cut to full depth and new concrete shall abut the newly cut joint. All saw cutting shall be performed in a safe manner insuring that silica dust is prevented from entering the atmosphere. At the direction of the Director this method shall also be used when old concrete that is to be removed abuts any asphalt surface.

2. **Finishing.** The concrete shall be struck off with a transverse template resting upon the side forms. After the concrete has been struck off to the required cross-section, it shall be finished with floats and straightedges until a smooth surface has been obtained.

When the surface of the concrete is free from water and just before the concrete attains its initial set, the surface shall be gone over and finished with a wooden float and brushed with a wet, soft-haired brush. The surface of the concrete shall be so finished as to drain completely at all times. All edges shall be finished and rounded with an edging tool having a radius of ¼ inch.

The surface shall be divided into blocks by use of a grooving tool. Grooves shall be so placed as to cause expansion joints to be placed at a groove line. The grooves shall be cut to a depth of not less than ½ inch. The edges of the grooves shall be finished with an edging tool having a radius of ¼ inch.

3. **Expansion Joints.** Expansion joints shall be ½ inch wide, placed at the mid point of the reconstructed driveway apron, and shall be filled with preformed expansion-joint filler. Expansion joints shall be formed around all appurtenances such as manholes and utility poles extending into or through the concrete. Preformed expansion joint filler, ¼ inch thick, shall be installed in these joints. Expansion joint filler shall be installed between concrete and any fixed structure, such as a building or bridge. The expansion joint material shall extend for the full depth of the concrete. Where the concrete apron is to abut an existing bituminous driveway the bituminous driveway shall be neatly saw cut to meet the concrete apron. Saw-cutting is to be done carefully so that the existing bituminous pavement is not damaged or disturbed. The new apron is to abut the existing bituminous joint in a clean and neat manner with a ½ inch expansion joint the full depth of the new concrete.

The top and ends of expansion joint material shall be cleaned of concrete, and the expansion joint material shall be so trimmed as to be slightly below the surface of the concrete.

4. **Protection and Curing.** Forms may be removed when removal does not damage the concrete. No pressure shall be exerted upon the concrete when removing forms. Protection during cold weather and curing shall be according to Subsection 504.03.02C1.

**For additional protection against scaling from freeze-thaw and deicing materials, the concrete must be protected with a commercially available silane or siloxane-based breathable concrete sealer or water repellent specifically designed for concrete slabs such as Silox-Seal manufactured by Amteco, Inc. located at 1841 F Marietta Blvd., Atlanta, GA 30318, telephone number 800 297 7325 or approved equal. The manufacturer's recommendations must be followed for application procedures and frequency. Prior to use of the sealer, the contractor must provide technical information on the product to be used for approval by the Director.**

Pedestrians will not be permitted upon concrete surfaces until 24 hours after finishing concrete. Vehicles or loads shall not be permitted until the concrete has reached a compression strength of 3,000 pounds per square inch.

Such barricades and protection devices as are necessary shall be constructed and placed to keep pedestrians off the public sidewalk curb ramps.

Any concrete driveway damaged before acceptance shall be repaired by removing concrete within groove limits and replacing it with concrete of the type and finish as is in the original construction. Damage caused by construction operations or cold weather shall be repaired without additional compensation.

**Item. 8.0 Cast in Place Detectible/Tactile Warning Surface Tile**

**8.01 Description.**

This work shall consist of installing as per manufacturer's specifications 2 feet by 4 feet engineered plastic tiles in concrete handicap ramps. The tiles shall be those manufactured by Armor-Tile, part number ADA-0-2448 in the red color, a product of Engineered Plastics located at 300 International Drive, Suite 100, Williamsville, NY 14221 or approved equal. (See Armor-Tile detail sheet at the end of the specifications)

**MATERIALS**

**8.02 Materials.**

Cast in Place Detectible/Tactile Warning Surface Tiles shall consist of 2 feet by 4 feet wide engineered plastic tiles specifically manufactured to be imbedded in ADA concrete handicap ramps. The tiles shall comply with the detectible warnings on walking surfaces section of the Americans with Disabilities Act (Title III Regulations, 28 CFR Part 36 ADA STANDARDS FOR ACCESSIBLE DESIGN, appendix A, Section 4.29.2 DETECTIBLE WARNINGS ON WALKING SURFACES). The construction and design layout shall follow the guidelines set forth in the latest version of the Public Right of Way Accessibility Guide (PROWAG). The Vitrified Polymer Composite (PVC) tiles shall be an epoxy polymer composition with an ultra violet stabilized coating employing aluminum oxide particles in the truncated domes.

**CONSTRUCTION**

**8.03 Construction**

The concrete shall be poured with a 5 to 7-inch slump and finished true and smooth to the required dimensions and slope prior to the tile placement. The tile shall be immediately placed square and true adjacent to the curb edge. The Cast in Place Detectible/Tactile Warning Surface Tiles shall be tamped (or vibrated) into the fresh concrete to ensure that the field level of the tile is flush to the adjacent concrete surface. The embedment process shall not be accomplished by stepping on the tiles as this may cause uneven setting which can result in air voids under the tile surface. The tile field level (base of the truncated domes) shall be flush with the adjacent concrete surfaces to permit proper water drainage and eliminate tripping hazards between different adjacent finishes. No concrete is to be removed in the area where the tile is to be placed. Voids in

the tile are meant to be filled thoroughly so that the tile is firmly imbedded in the concrete.

While the concrete is still workable, a 3/8-inch radius edging tool shall be used to create a finished edge along the perimeter of the tile. The concrete around the tile shall be smoothed with a steel trowel and then broom finished to match all other sidewalk finishes. During the curing period the tile must not be disturbed. To avoid floating up of the tile while curing two 25 pound weights are to be placed on either end of the tile. During this process the protective plastic wrap shall remain intact on the tile. Upon curing it can be removed with a sharp knife by cutting tight along the interface of the tile/concrete.

## **COMPENSATION**

### **8.04 Method of Measurement**

The method of measurement for payment of Cast in Place Detectible/Tactile Warning Surface Tiles shall be by counting each individual tile placed according to specifications. Each tile shall be paid at the unit price as bid in the contract.

### **8.05 Basis of Payment**

Unit price for this item shall be made per unit installed as per specifications to include all labor, materials and equipment as counted in the field. Upon inspection and approval by the Township of Piscataway, payment will be made under:

Each ramp in the proposal and any additional ramp that may be added under an "If and Where" condition must be individually designed by providing a drawing with a title block and signature of the professional engineer pursuant to the requirements of the NJ Board of Professional Engineers and Land Surveyors. Each drawing shall be signed and sealed by the licensed Professional Engineer who provided the design and two (2) copies shall be submitted to the Director of Public Works for record keeping. The contractor shall keep a copy on the worksite for inspection purposes.

### **9.02 Ramp Identity**

The drawing for each ramp shall indicate the location of the ramp so that it is easily identifiable in the field. There should also be included calculations indicating the square feet of concrete and the square feet of cast in place detectible/tactile warning surface tile required to construct a fully compliant ramp per New Jersey Department of Transportation Standard Construction Details 2016.

**9.03 Method of Measurement**

Each Concrete Sidewalk Public Curb Ramp shall be measured as a unit. Regardless of degree of design and size, for the purpose of payment for Engineered Design of Concrete Sidewalk Public Curb Ramps, an average cost shall be determined from the total number of ramps so that a consistent unit price is established.

**9.04 Basis of Payment**

Payment for Engineered Design of Concrete Sidewalk Public Curb Ramps shall be on a per unit basis for the design of each ramp as submitted pursuant to the specifications of paragraph 9.01. The unit price shall be consistent regardless of ramp design and/or size.

CD-608-2

NEW JERSEY DEPARTMENT OF TRANSPORTATION

**CONSTRUCTION DETAILS**

- NOTES:**
- KEEP TURNING SPACE, APPROACH SIDEWALK TRANSITIONS, AND CURB RAMP CLEAR OF OBSTRUCTIONS THAT PROTRUDE ABOVE THE SURFACE.
  - CROSSWALKS AND STOP LINES MAY BE MARKED OR UNMARKED, SEE PLANS.
  - FOR NARROW ISLAND WIDTH, SEE PEDESTRIAN REFUGE ISLAND WALKWAY OPENING AT INTERSECTIONS DETAIL.
  - FOR MEDIUM AND LARGE ISLAND WIDTH, SEE CURB RAMP TYPE 1 ON CD-608-1.
  - CONSTRUCT CURB RAMP TYPES 1, 2, 3, 4, & 7 PERPENDICULAR TO CURBLINE, AS SHOWN.
  - IF A CURB RAMP IS REQUIRED, THE LOCATION OF THE DETECTABLE WARNING SURFACE MUST BE AT THE BOTTOM OF THE RAMP AND WITHIN THE REQUIRED DISTANCE FROM THE RAIL.
  - THE RAMP DETECTABLE WARNING SURFACE SHOULD COVER THE ENTIRE WIDTH OF THE RAMP. THE ROWS OF DOMES ON THE DWS SHOULD FOLLOW THE DIRECTION OF TRAVEL OF THE RAMP, SO PEDESTRIANS WHO USE MOBILE DEVICES CAN TRACK BETWEEN THE DOMES.

LEGEND

1. FOR CURB RAMP TYPES SEE CD-806-1.

2. THE ABOVE TABLES ARE BASED ON THE SPECIFIC GUTTER PROFILE REFERENCED. THEY DO NOT TAKE INTO ACCOUNT VARIATIONS IN THE GUTTER PROFILE. THE ABOVE TABLES TO BE USED BY THE DESIGNERS AND CONTRACTORS TO GET APPROXIMATE DIMENSIONS OF THE CURB RAMP AT EACH LOCATION. FINAL DIMENSIONS WILL BE DETERMINED BY ACTUAL MEASUREMENTS IN THE FIELD DURING CONSTRUCTION.

3. THE "SHOW MAX SLOPE" IS THE RUNNING SLOPE FOR CURB RAMPS, BUT ONLY THE "SHOW SLOPE" MEASURED AS "X" IS THE RUNNING SLOPE FOR TYPE 2 AND TYPE 4 CURB RAMPS. ENSURE THE RUNNING SLOPE OF CURB RAMPS DOES NOT REQUIRE ITS LENGTH TO EXCEED 15 FEET. THE RUNNING SLOPE MAY EXCEED THE "SHOW MAX SLOPE" AS LONG AS IT DOES NOT EXCEED THE 15 FEET LENGTHS WHICH EXCEED 15 FEET.

4. DIMENSIONS SHOWN IN TABLES ARE FOR 8 INCH TO 8 INCH CURB HEIGHTS, WHERE THE CURB HEIGHTS ARE GREATER THAN WHAT IS PROVIDED IN THE TABLES. THE DIMENSIONS OF THE RAMPS WILL HAVE TO BE CALCULATED BASED ON CROSS SLOPES SHOWN.

- 1. Good Faith-** To act in good faith means to act in accordance with standards of honesty. In general, registered sellers who accept exemption certificates in good faith are relieved of liability for the collection and payment of sales tax on the transactions covered by the exemption certificate.

In order for good faith to be established, the following conditions must be met:

- (a) Certificate must contain no statement or entry which the seller knows is false or misleading;
- (b) Certificate must be an official form or a proper and substantive reproduction, including electronic;
- (c) Certificate must be filled out completely;
- (d) Certificate must be dated and include the purchaser's New Jersey tax identification number or, for a purchaser that is not registered in New Jersey, the Federal employer identification number or out-of-State registration number. Individual purchasers must include their driver's license number; and
- (e) Certificate or required data must be provided within 90 days of the sale.

The seller may, therefore, accept this certificate in good faith as a basis for exempting sales to the signatory purchaser and is relieved of liability even if it is determined that the purchaser improperly claimed the exemption.

- 2. Improper Certificate** - Sales transactions which are not supported by properly executed exemption certificates are deemed to be taxable retail sales. In this situation, the burden of proof that the tax was not required to be collected is upon the seller.
- 3. Correction of Certificate** - In general, sellers have 90 days after the date of sale to obtain a corrected certificate where the original certificate lacked material information required to be set forth in said certificate or where such information is incorrectly stated.
- 4. Additional Purchases by Same Purchaser** - This Certificate will serve to cover additional purchases by the same purchaser of the same general type of property or service. However, each subsequent sales slip or purchase invoice based on this Certificate must show the purchaser's name, address and Certificate of Authority Number for purpose of verification.
- 5. Retention of Certificates** - Certificates must be retained by the seller for a period of not less than four years from the date of the last sale covered by the certificate. Certificates must be in the physical possession of the seller and available for inspection on or before the 90th day following the date of the transaction to which the certificate relates.

**6. Definitions:**

**"Contractor"** - means any individual, partnership, corporation or other commercial entity engaged in any business involving erecting structures for others, or building on, or otherwise improving, altering, or repairing real property of others.

**"Exempt Organization"** - is any organization which holds a valid exempt organization permit issued pursuant to the provisions of N.J.S.A. 54:32B-9(b) which has issued an ST-5 Exempt Organization Certificate to the contractor.

**"New Jersey or Federal Governmental Entity"** - is any agency, instrumentality, political subdivision, authority, or public corporation of the governments of the United States of America or the State of New Jersey. Governmental agencies, instrumentalities or political subdivisions of states other than New Jersey do not qualify for exemption.

**"Qualified Housing Sponsor"** - is any person, partnership, corporation or association certified by the New Jersey Housing and Mortgage Finance Agency to have obtained financing, in addition to federal, state or local government subsidies, for a housing project from the New Jersey Housing and Mortgage Finance Agency pursuant to N.J.S.A. 55:14K-1, et seq. and has issued a New Jersey Sales and Use Tax Housing Sponsor Letter of Exemption to the contractor.

PRIVATE REPRODUCTION of Contractor's Exempt Purchase Certificates may be made without the prior permission of the Division of Taxation.

While completion of Form WH-347 is optional, it is mandatory for covered contractors and subcontractors performing work on Federally financed or assisted construction contracts to respond to the information collection contained in 29 C.F.R. §§ 3.3, 5.5(a). The Copeland Act (40 U.S.C. § 3145) contractors and subcontractors performing work on Federally financed or assisted construction contracts to "furnish weekly a statement with respect to the wages paid each employee during the preceding week." U.S. Department of Labor (DOL) regulations at 29 C.F.R. § 5.5(a)(3)(ii) require contractors to submit weekly a copy of all payrolls to the Federal agency contracting for or financing the construction project, accompanied by a signed "Statement of Compliance" indicating that the payrolls are correct and complete and that each laborer or mechanic has been paid not less than the proper Davis-Bacon prevailing wage rate for the work performed. DOL and federal contracting agencies receiving this information review the information to determine that employees have received legally required wages and fringe benefits.
